
Professional Summary

Back-End Developer focused on Java and Spring Boot, with hands-on experience in REST API development, microservices architecture, and DevOps practices. Experience in application support, automation, and deployment using Docker, Rancher, and Kubernetes in an institutional environment. Knowledge of system integration, layered architecture, Git version control, and object-oriented development.

Professional Experience

DevOps Intern	Regional Electoral Court of Tocantins	Aug 2024 – Mar 2026
----------------------	--	----------------------------

- Support, automation, and deployment of corporate applications using Docker, Rancher, and Kubernetes.
- Participation in containerization processes, service orchestration, and maintenance of distributed environments.
- Development of a Java + Microservices API to consolidate queries across three institutional databases, centralizing information and reducing response time for multiple departments.
- Support for activities related to DevOps, system integration, technical support, and continuous application improvement.

Education

Palmas - TO	State University of Tocantins - UNITINS	2023 – 2027
--------------------	--	--------------------

- Bachelor's Degree in Information Systems.
- Main areas of study: Java, Spring Boot, REST APIs, Databases, Software Architecture, Microservices, Docker, Kubernetes, Angular, and Full Stack Development.

Alura — Complementary Technology Education	2024 – Present
---	-----------------------

- Complementary education in Java, Spring Boot, REST APIs, Docker, Kubernetes, Angular, TypeScript, Git/GitHub, Microservices, and DevOps.
- Studies focused on Back-End development, software architecture, and software engineering best practices.

Technical Skills

- **Back-End:** Java, Spring Boot, Spring MVC, Spring Data, Spring Security, REST APIs, Laravel
- **Front-End:** JavaScript, HTML, CSS, Angular
- **DevOps:** Docker, Kubernetes, Rancher, Linux, NGINX
- **Databases:** PostgreSQL, MySQL, SQL Server, MongoDB, Redis
- **Tools:** Git, GitHub, Postman, Insomnia
- **Methodologies:** Scrum, Kanban, and Agile Methodologies

Soft Skills

- Interpersonal communication and teamwork
- Problem-solving and analytical thinking
- Organization, proactivity, and autonomy

Languages

- Portuguese — Native
- English — Advanced
